ORDERING NOTES:

Fold alignment for side-by-side applications must be specified at time of order.
 To ensure fold alignment for side-by-side applications, shades must be ordered on the same order with identical height and color. Fabric fold alignment is determined by the position of the glue lines visible on the white knit back fabric with the shadings in the fully lowered position. Alignment variances should not exceed 1/4" from unit to unit in side-by-side and Multi-Panel applications.

* Please specify left and right panel widths for Two-On-One Headrail or Multi-Panel shades. 12" minimum panel width per panel. 71" maximum panel width is only available on shades ordered with uneven panels. Overall shade width cannot exceed 140" on unequal panel orders, the smaller panel must be at least 1/3 the width of the entire shade size.

** End mount only.
